DETAILED ACTION

Election/Restrictions

- 1. This application contains claims directed to the following patentably distinct species: Claims 1-23 show more than one claimed invention:
- 2. (Note: Examiner is referring to the pages of the specification for instant application 10/823612 when stating, "identified at page XX"- for clarity).
- 3. Species 1, drawn to Embodiment 1, identified at page 42 where Figure 7 exemplifies the arrangement of a moving decoding apparatus.
- 4. Species II, drawn to Embodiment 2 (Figures 10-12 and 14), identified at page 33 where the second embodiment will exemplify wherein encoded moving imaged data which is generated by subband decomposition using a real number type 5X3 filter is to be decoded.
- 5. Species III, drawn to Embodiment 3 (Figures 7, 9, and 15), identified at page 39 where the third embodiment will exemplify determining the non-decoding parts for respective passes.
- 6. Species IV, drawn to Embodiment 4 (Figures 17-19), identified at page 43, where the fourth embodiment will exemplify wherein where the moving image data output unit comprises the buffer and display interface, and the display is connected to display a moving image, an equivalent process can be implemented by monitoring the numbering of frame data stored in the buffer without actually measuring the decoding process time.

Application/Control Number:

10/823,612 Art Unit: 2621

- 7. Species V, drawn to Embodiment 5 (Figures 21, 24, and 26), identified at page 51, where the fifth embodiment will exemplify wherein the basic arrangement of an image decoding apparatus.
- 8. Species VI, drawn to Embodiment 6 (Figure 25), identified at page 67, wherein the sixth embodiment decodes encoded image data that has undergone subband decomposition using a real number type 5X3 filter.
- 9. The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species.
- 10. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species with the appropriate Figure(s) of the drawings that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

10/823,612 Art Unit: 2621

There is an examination and search burden for these patentably distinct species due to their mutually exclusive characteristics. The species require a different field of search (e.g., searching different classes/subclasses or electronic resources, or employing different search queries); and/or the prior art applicable to one species would not likely be applicable to another species; and/or the species are likely to raise different non-prior art issues under 35 U.S.C. 101 and/or 35 U.S.C. 112, first paragraph.

Applicant is advised that the reply to this requirement to be complete <u>must</u> include (i) an election of a species to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

The election of the species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the election of species requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected species.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

Application/Control Number:

10/823,612 Art Unit: 2621

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the species unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other species.

A telephone call was made to request an oral election to the above restriction requirement, however Attorney of Record was unable to be reached. Therefore, there was not an election made before this requirement for election.

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventor ship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jessica Roberts whose telephone number is (571) 270-1821. The examiner can normally be reached on 7:30-5:00 EST Monday-Friday, Alt Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha Banks-Harold can be reached on (571) 272-7905. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
